

Customer Advisory

Date: 01.10.2025

Dear Valued Customers

Subject: Advisory on New Electronic Export Process & UCR Requirement

In alignment with the new directives issued by governmental authorities regarding the **digitalization of local Egyptian export shipments**, we would like to draw your attention to the updated process introduced by **Misr Technology Services (MTS)**.

As per the attached workflow, a **new export cycle** will be implemented, including the mandatory use of a **Unique Consignment Reference (UCR)** starting **Thursday, October 30, 2025**.

Please note that **effective from this date**, all local export shipments must obtain a **UCR in advance** — a unique and non-repetitive identifier for each export consignment (رقم تعريفى غير متكرر مميز لشحنة الصادر).

For any technical clarifications regarding the UCR requirements or registration procedures, we kindly advise you to contact **MTS directly**. This applies to all shippers, booking parties, and freight forwarders involved in the export process.

A **testing phase** for the new export cycle began on **September 30, 2025**, allowing stakeholders to familiarize themselves with the system and ensure readiness.

We remain committed to providing you with the highest level of support and thank you for your continued cooperation.

Thank you for your support and partnership with ESL.
